

# DATAPATROL

ScreenDefender  
Real-Time Screen Data Breach Prevention.

SCREENDEFENDER

ScreenDefender is a powerful new feature developed by DataPatrol. It uses advanced image processing mechanisms to detect if an insider is using their personal mobile phone or camera to capture information shown on the screen, and prevent unauthorized data exfiltration.

## Deter, Monitor & Prevent insider threats

With ScreenDefender, organizations can protect against the risk of sensitive information being captured and leaked by employees, contractors, or other insiders with access to confidential information. By detecting and blocking unauthorized image captures, ScreenDefender provides an added layer of security to ensure that your organization's confidential information stays safe and secure.

## How does the ScreeDefender benefit your organization?

1. Prevents data exfiltration.

2. Adds an extra layer of security

3. Easy to use

4. Reduces the risk of insider threats

5. Enhances compliance

6. Protects intellectual property

### AN EASY TO USE PLATFORM

ScreenDefender is easy to use and can be seamlessly integrated into your existing cyber security software.

It is a must-have tool for any organization that wants to protect against the risk of data exfiltration and safeguard its confidential information.
