

DATA PATROL

Enhance Security and Accountability with DataPatrol WebMark

Introducing DataPatrol WebMark, a smart watermarking solution that helps businesses improve website security.

With WebMark, you can easily add custom watermarks using our simple SDK and APIs, without needing extra software. This feature allows you to show important information like the time, date, and user details on your site, making it easier to identify any leakage. WebMark works well on all web browsers and devices, ensuring a clear and professional look everywhere. It's a great choice for companies that want to keep their online portals safe while providing a good experience for users.

Why Does Watermarking Matter?

Securing sensitive data and enhancing user accountability are critical for businesses managing private CRMs, web apps, and online platforms. Unauthorized access, data leaks, and compliance risks are increasingly common challenges.

Watermarking is a powerful tool that:

- ▶ Deters Unauthorized Actions
- ▶ Monitor User Behavior
- ▶ Prevents Data Misuse
- ▶ Enhances accountability

“89% of IT professionals rank user activity tracking and data visibility as critical security measures for 2024, making solutions like WebMark essential for safeguarding platforms and ensuring accountability.”

Why Use DataPatrol WebMark?

DataPatrol WebMark offers a seamless and reliable solution for implementing watermarking on websites and online platforms.

It goes beyond traditional watermarking tools by providing:

- ▶ **Effortless Integration:** Quickly deploy watermarks without additional software using SDKs and APIs.
- ▶ **Real-Time Customization:** Display key details such as time, date, user ID, and session activity to ensure full accountability.
- ▶ **Cross-Platform Compatibility:** Operates seamlessly across all browsers, operating systems, and devices.
- ▶ **Enhanced Security:** Protects against data breaches by adding user-specific watermarks that deter unauthorized access.
